*Alternate year courses. Even/odd designation refers to calendar year (NOT to the year in which the academic year began).

Boldface print denotes major course requirement. A statistics class is also highly recommended. Other suggested elective courses include NTR225 Fundamentals of Nutrition and NTR340 Human Pathophysiology.

Boldface and italics print denotes the five extra courses added to the biology major for the pre-medicine major. Total hours needed to complete graduation requirements are 124. (This includes 2 hours of Arts and Lecture credit.) **Note:** This plan assumes that Scientific Inquiry and Critical Analysis competencies are met by the major. In general,

competencies may be taken in any order. The exceptions are that Writing Well should be taken in the first year and Reading the Bible must be completed prior to taking the Religious Understanding competency. The timing of the remaining competencies is flexible and may be adjusted to accommodate desired elective courses.

Introduction to Psychology is often a prerequisite course required for further study in the medical field and should be taken for the Understanding Self and Society competency. **Introduction to Sociology** is also recommended.
