*Alternate year courses

Boldface print denotes major course requirement. Students anticipating graduate study should take Calculus 2 and Organic Chemistry 2. A statistics class is also highly recommended. In addition, CEM 341 Biochemistry (offered spring of odd years) is encouraged. Other suggested elective courses include NTR225 Fundamentals of Nutrition, NTR340 Human Pathophysiology, or upper-level chemistry courses.

Total hours needed to complete graduation requirements are 124. (This includes 2 hours of Arts and Lecture credit.)

Note: The Scientific Inquiry and Critical Analysis competencies are met by the major. In general, competencies may be taken in any order. The exceptions are that Writing Well should be taken in the first year and Reading the Bible must be completed prior to taking the Religious Understanding competency. The timing of the remaining competencies is flexible and may be adjusted to accommodate desired elective courses.
